Summary

Experienced Lead Data Platform Engineer with extensive expertise in designing and implementing enterprise-scale data platforms for financial services organizations. Proven track record of leading technical teams and delivering secure, scalable data solutions that drive business value while maintaining the highest standards of compliance and operational excellence.

Top Skills

- Distributed Systems Architecture
- Enterprise Data Platforms
- Cloud Infrastructure & DevOps
- SQL & Stream Processing
- Technical Leadership & Mentoring
- Cross-functional Collaboration

Languages

- **English** (Native)
- **Portuguese** (Professional)

Certifications

- AWS Certified Solutions Architect - Professional
 - Microsoft Azure Data Engineer Associate
 - Google Cloud Professional Data Engineer
 - Databricks Certified Data Engineer Professional
 - Kubernetes Certified Application Developer
-

Experience

FinTech Data Solutions Inc.

Lead Data Platform Engineer *January 2019 - Present (6 years 9 months) New York, New York, United States*

Leading enterprise data platform development for major financial services clients across banking, insurance, and investment sectors. Responsible for architecting scalable, secure data solutions and managing cross-functional engineering teams.

- Develop and execute data platform strategy advancing analytics capabilities, including evaluating new technologies and establishing architectural standards across business units
- Lead engineering teams of 10-15 engineers through technical guidance, code reviews, and architectural oversight ensuring high-quality platform delivery
- Design and implement enterprise data solutions including data lakes, streaming platforms, and analytical systems supporting real-time and batch processing requirements
- Collaborate closely with business stakeholders to understand requirements and technical constraints, identifying opportunities to leverage modern data technologies
- Build and maintain production data platforms and supporting cloud infrastructure using automated deployment pipelines and site reliability engineering practices
- Drive technology evaluation and vendor selection processes, including proof-of-concept development and technical assessments resulting in 35% cost reduction

DataCore Financial Systems

Senior Data Platform Architect *(March 2016 - December 2018)* **Data Platform Engineer** *(August 2014 - February 2016) Boston, MA*

Led the design and implementation of enterprise data platforms for mid-market financial services clients. Specialized in distributed systems architecture and modern data engineering patterns.

- Architected and implemented large-scale data platforms supporting 50+ TB daily processing volumes across multiple cloud providers
- Developed infrastructure as code templates and DevOps pipelines that became standard practice across the engineering organization
- Mentored junior engineers and established technical best practices for enterprise data platform development
- Collaborated with global engineering teams and platform architects to establish best practices and ensure consistency across technology stack

CloudFirst Analytics

Senior Data Engineer *June 2012 - July 2014 (2 years 1 month) Boston, MA*

- Led data platform modernization initiatives and developed cloud migration strategies for enterprise financial services clients
- Implemented ETL/ELT pipelines and data integration solutions using modern cloud-native tools and frameworks
- Designed and built real-time streaming data platforms supporting business critical applications with 99.95% uptime SLA
- Contributed to engineering culture through technical mentoring, knowledge sharing, and participation in architecture review processes

CloudFirst Analytics is a leading provider of cloud transformation and data modernization services for financial services enterprises.

Quantum Data Consulting

Data Solutions Engineer *September 2010 - May 2012 (1 year 8 months) Boston, MA*

- Designed and implemented data warehouse solutions and business intelligence platforms for clients in financial services and fintech
- Developed SQL-based analytics solutions and automated reporting systems that improved decision-making processes
- Created technical documentation and conducted training sessions for client technical teams
- Assisted in database design and optimization projects to improve query performance and system scalability

Quantum Data Consulting specializes in data analytics and business intelligence solutions for financial services organizations.

Metropolitan Data Systems

Junior Data Analyst *June 2009 - August 2010 (1 year 2 months)*

Supported data analysis and reporting initiatives across multiple client projects:

- Developed automated data processing workflows and quality monitoring systems to ensure data accuracy and completeness
- Created interactive dashboards and visualization tools for executive reporting and operational monitoring
- Assisted in database design and optimization projects to improve query performance and system scalability

Education

New York University

Master of Science (MS), Computer Science - Data Systems Track 2007 - 2009

Boston University

Bachelor of Science (BS), Software Engineering and Mathematics 2005 - 2009
